MUN. ELECTION IN 3 DIVISIONS

The annual general meeting of the Carbon Municipal District No. 278 was held in the Masonic hall, Carbon, on Saturday, February 19th. The financial statement and other general business relating to the municipal district was discussed before a large number of ratepayers.

Following the meeting, nomination for councillors in all divisions was open and when the time was up for this, the following candidates were nominated:

Division 1—S. N. Wright.
Division 2—Gottlieb Ohlhauser and Edward Schell.
Division 3—W. H. Levins and Robt. D. Bernes.
Division 4—Chas. G. McMann, and Harold Offer.

Division 5—H. H. Crowell.
Division 6—G. H. Webber.
Division 7—O.M. Grieve.

With two nominations in Divisions 2, 3 and 4, there will only be elections in these divisions, all other candidates being elected by acclamation.

Elections will take place on Saturday, February 27th, and all ratepayers interested in the welfare of the municipality and their own particular division are urged to cast a ballot on that day.

We learn that one man, who carried his nomination paper with him, could not get to town in time, on account of the roads, and therefore his nomination was not received. This was in Division 5, and as a result, Mr. Crowell, the retiring councillor and a candidate again this year, was elected by acclamation.

The three Carbon rinks which entered the Acme bonspiel last week, were all successful in getting into the prizes, every one in a different event. The Poxon rink lost their first game, but the went right through to the finals in the Citizen's event, losing a hard fought game only when the opposing rink from Carstairs made a five end on the tenth. The final score was 11-12.

The Fairbairn rink won their first game in the Grand Challenge and were successful in getting into the finals in this event. They lost out in the Citizen's event.

The Garrett rink, skipped by Harry Jealous, won their first game in the Grand Challenge and then lost out in both major events. They played in the first consolation and were successful in getting into the finals before losing a hard game to J.C. Smith of Acme on the last end.

AVONDALE WHIST DRIVE AND DANCE

Another whist drive and dance was held at the Avondale school on Friday evening, February 19th and a fair crowd was present. There were seven tables of whist, prize winners being: Ladies' first, Miss A. Graham; ladies consolation, Mrs. Poole. Men's first, Leslie Bramley; Men's consolation, B. Poole.

Following the cards, a dance was held and a number of the Carbon young people went out for this part of the entertainment. Music was furnished by a local orchestra composed of Miss Watkins, Leo Trepanier, Del Fox and C. Freisen.

ROADS BLOCK'D; BEING OPENED

All roads in the district have been blocked the past week with snow, with the exception of the Carbon-Acme road which has been in use by taking to the fields in numerous places. On Monday of this week a number of local townspeople, headed by our local constable, M. Moriarty (we are told) determined to open the road south to the pole line at the Central Service Station and by taking to the fields in some places they were able to get through and the road is now being used again. The Drumheller trail is also open again, after being closed for more than a week. We understand that a private company opened this road for their own benefit as well as others, when the provincial government refused to have anything to do with the work.

This is the first time in about four years that we have had snow enough in the district to block the roads, and travellers to the west call this the snow belt.

NEW FORD CARS TO GIVE JOBS TO 35,000 MORE MEN

Announcement of an improved Model A Ford and a new Ford V-8 is considered to have an importance far beyond the immediate curiosity of the public, with potential results affecting the course of national business.

Already news received by the Labor Department from Detroit is that 35,000 additional workers will be taken on by Mr. Ford. The possible stimulus to the motor industry, and through that to allied industries reaching into the industrial world, are considered significant.

Grants to Alberta fairs last year cost the provincial government \$36,682.

ALBERTA NEWS

Alex Menziuk of Lessard Post Office, homesteader in the district, committed suicide sometime January 15th, by hanging himself to a poplar tree on his homestead 22 miles north east of Bonnyville.—St. Paul Journal.

Two Calgary boys suffered serious injuries last Tuesday evening when a large bob-sleigh, on which they were riding, crashed into the rear wheel of an automobile.

The printing plant of the Hanna Herald was completely destroyed by fire on Saturday night. The loss, which is estimated at approximately \$15,000, is partly covered by insurance.

Accidentally shot late Wednesday afternoon while on a shooting trip, H. Miller, farmer of the Dickson district, west of Innisfail, is a patient in the hospital, with good chance of recovery. Miller was out shooting rabbits south of Innisfail when he tripped over an obstacle and discharged the .22 calibre rifle he was carrying. The bullet struck him above the right eye and glancing upward, lodged in his head near the skull.

Although the Royal Canadian Mounted Police will be seen policing the province in the near future, the "cops" of Calgary will carry on under the present system.

The bullet-ridden body of Albert Johnson, allegedly demented trapper of the Rat River country, who was shot and killed by a Royal Canadian Mounted posse on the Eagle River, was taken to Aklayik last Thursday by Captain W.R. "Wop" May, by aeroplane.

Decision to hold the Calgary horse show, despite the reduction in provincial government grant, was made by directors of the Alberta Horse Breeders' Association on Tuesday afternoon.

That the unalienated land of Alberta, some 100,000,000 acres in all, be sold to actual settlers for \$1 to \$3 or more an acre, according to location, as a land settlement scheme for the solution of the unemployment problem, was the suggestion advanced in legislation last week by John Irwin, Conservative, in continuing the debate on the Speech from the Throne. He would have the first payment not less than \$25 with interest at 6 per cent on the unpaid balance.

Two hundred skaters and two hundred onlookers were responsible for the success of the ice carnival held at the Olds Arena last Monday. A strong nor' west wind prevented a large crowd from attending the function.

The yarn told in connection with Johnson, the demented trapper, who has eluded the finest of police in the north country for the past eight weeks, has created an abundance of humor among the men of town. The originator of the yarn, stated that Johnson was now living on milk as his other supplies had run out. The inquisitive asks the question—"where does he get his milk?" and the answer he receives is—"From the policeman's goat."—Olds Gazette.

It is reported that the provincial government, in order to cut down expenses, has decided to close the School of Agriculture at Vermilion.

TWINE LOANS REACH TOTAL OF \$269,278.00

The total value of binder twine advanced by the banks last fall, under government guarantees, was \$269,278. It was disclosed in information given recently in the House.

At January 31st, last, the sum of \$201,672 had been repaid, leaving some \$67,605 outstanding.

There were 5,363 individual farmers who obtained twine under the government guarantee, while 4,028 have paid their indebtedness in full.

LETTER TO THE EDITOR

The Editor, The Carbon Chronicle.

Dear Sir:—

Will you allow me space in your valuable paper to render a hearty vote of thanks to all the members of the Carbon Curling Club for the splendid time they gave the ladies in the mixed bonspiel. I am sure the rest of the ladies join me in this and wish success to the club and also to the future Ladies' Curling Club of Carbon.

MRS. J. C. REED.

MIXED CURLING BONSPIEL ENDS

The local mixed bonspiel has come to an end. There were three events played and many close games resulted. In the first event Bessant came out by defeating Macdonald in the finals. In the consolation of this event Sandy Reid won out. In the second major event the Bessant and Macdonald rinks again succeeded in getting into the finals, but with the Bessant rink winning out in the first event, they were not eligible for the prize, the Macdonald rink being declared the winner. Many would like to see this game played off. So would we.

Square Draw To Be Finished

With the mixed bonspiel over, the old square draw has again been commenced and the old rinks are again playing together. This competition will continue, it is expected, till the end of the curling season.

This year has been a successful one for the Carbon Curling Club, both financially and otherwise. All the old bills have been paid and \$100 and interest has been paid on the note on the building; the curling rocks have all been re-sharpened; and the largest bonspiel in the history of the club was held this year. To crown the event, a mixed bonspiel was inaugurated for the first time, and many ladies have become interested in the game. Next year should see the formation of a ladies curling club in Carbon. Apart from these events, there has been continuous curling since the rink opened, not one evening being lost for soft ice. With the large membership this year and the many new curlers, 1933 should be a banner year for the Carbon Curling Club.

FIRE DAMAGE AT G. OHLHAUSER'S

A disastrous fire was averted on Wednesday afternoon last, when the Delco Plant at the home of Gottlieb Ohlhauser, about five miles south of town, took fire. The Delco had been running and stopped when it ran out of gasoline. When Mr. Ohlhauser was in the act of filling the tank, the gasoline, we understand, caught fire and spread throughout the basement of the house. A fire extinguisher was used, but without result, and thinking that nothing could be done to save the house the fire was left and aid was summoned to help remove the furnishings of the large farm building. This was done in short order, with the help of neighbors, and the fire was again investigated. This time it was seen that the gasoline had all burned out and the floor was smouldering, but no great headway had been made by the flames. With a few buckets of water the embers were extinguished, the only damage done by the fire, outside of things in the basement, was the burning almost through of the lower floor. Considerable damage, however, was done to the furnishings and fixtures, which were hurriedly taken out.

After the fire willing friends helped to restore order in the place for the wedding, which was to take place the following day at the house, and it was not long before things were in order again.

We understand that some insurance was carried on the building and its contents.

GRAVEL HIGHWAYS IN ALBERTA 1,575 MILES

Alberta has 1,575 miles of gravelled highways according to information given to the House by Hon. O.L. McPherson, minister of public works.

In addition, says the minister, the province has 60 miles of bituminized gravel roads, and 755 miles of standard grade ready for gravel surfacing. 71 miles of standard grade are under construction, while 330 miles have been built in conjunction with municipalities.

Wife—If I were to die what would you do?

Husband—Oh, the same as you would yourself.

Wife—You wretch! I have always suspected it.

Are We Over-Governed?

Considering, in this concluding article, some of the broader aspects of the above subject which we have been discussing in this series of articles, it is self-evident that any conclusion to be reached must be based upon the effect upon (a) efficiency; (b) economy; (c) the individual taxpayer. It might be possible to achieve a substantial reduction in Provincial expenditures by imposing upon the municipalities the obligation of providing certain services, as, for example, the making of smaller grants for schools or municipal roads, but this would simply mean increasing the burden to be borne by the individual taxpayer in his municipality in exact ratio to the lessening of that burden upon the same individual in his capacity as a Provincial taxpayer. Thus, there would be no gain. Or a lessening of the weight of taxation imposed by the Province might be effected by transferring certain obligations to the Dominion, as, for example, Old Age Pensions. But, again, there would be no gain because what the individual did not pay to the Province in taxes he would have to pay in increased Federal taxes.

Any gain, therefore, must be the result, not of a shifting of the burden from one shoulder to another, but the entire elimination of the burden. This at once brings us face to face with the real problem. That is, are the people,—that is the taxpayers,—prepared to forego services and conveniences now provided by the State through taxation, and do without them altogether, or provide them individually for themselves where possible, in order that taxes may be reduced? Are they ready and willing to do without services and conveniences they expect will be provided in days to come, and do without them until the country is more thickly populated, better developed, and producing a substantially larger volume of new wealth annually?

Reduction in governmental machinery, whether it be accomplished through the merging of small school districts into larger districts, combining several small municipalities into one, or uniting the three prairie provinces into one large province, must result in some inconvenience to the people now served by the smaller units. If the three provinces were made one province, the Dominion Treasury would be saved the payment of two of the three grants now made to the Provinces for "Government and Legislation." As Federal taxpayers we would save this money; as Western Provincial taxpayers we would lose it, but if the cost of Provincial Government was reduced as a result, it would be money saved.

While it is open to serious question whether union of the three Western Provinces is now a practical proposition, especially when a comparison is made between the size of our Canadian provinces (except the three Maritimes), with the much smaller states across the line, or with such countries as Belgium, Holland, Denmark, Sweden, Norway, Italy, or even the larger European countries, except Russia, and having in mind the ultimate large populations of these three Provinces, it is quite practical to effect substantial savings through joint Provincial action, or in conjunction with the Dominion.

Such action is already being taken. Some years ago Saskatchewan disbanded its own Provincial Police Force and made a contract with the Dominion Government whereby the Mounted Police now perform police duties for the Province, thus effecting a large saving. Now Alberta and Manitoba are adopting the same policy. The need for a School for the Blind in the West is realized, but one such school will serve the needs of all three Provinces for many years to come; there is no necessity for erecting and maintaining three such schools, and, fortunately, this is recognized. We repeat, what was stated in a previous article, that, in our opinion, one Court of Appeal for the three provinces could handle all appeal cases, and it would appear the part of wisdom for the three Governments and the Dominion to give consideration to effecting such an economy.

These are but examples where inconveniences to the public would be small while the savings would be large, and are cited as indicating the general policy which, in the interests of the taxpayers, should be followed.

But to achieve even these reforms, and to inaugurate such policies for future development and extension, will necessitate a larger patriotism on the part of all, and the elimination of those local jealousies and sectional ambitions, all those purely selfish considerations which now operate to prevent many economies in governmental administration. All such considerations must be ruthlessly set aside for the common good of all taxpayers. If they are not it will be well nigh hopeless to effect necessary economies, or to prevent an even more serious condition of being over-governed than at present exists.

Governments are not so much to blame as are the people themselves, because Governments have acted in the past, and will act in the future, as the people desire, and if the people are actuated by petty, local, selfish considerations, rather than by a large and fine consideration for the welfare of the whole, their views will be reflected in future governmental action. The people can and will get what they demand, and as, in the final analysis, they must do the paying through the medium of taxation, it is up to them to decide just what they want.

A rare old grandfather clock—the work of Daniel Quare, a famous London clockmaker in the time of William III.—whose owner had not thought it to be worth more than £30, was sold for £425 in London.

Aerial photographs have shown up the plans of an old Irish town which figures in traditions but could not be located by ground explorations.

Hubby Dear—"That's a perfectly gorgeous coat Mrs. Perkins has—and just like yours, I wonder if hers is real mink?"

Wifey Dear—"Probably imitation. The hussy imitates everything I buy."

Another reason the radio is not to take the place of newspaper very soon is that the newspaper rarely fades out in the middle of a good story.

Nerves A Complete Wreck Sat Up Half The Night

Mrs. John Rose, Bark Lake, Ont., writes:—"I was troubled so much with my nerves I was a complete wreck."

I could not do my work, and would have to sit up half the night on account of not being able to sleep.

One day a friend recommended Milburn's Heart and Nerve Pills. I used one box and got relief, and by the time I had taken six boxes I was as well as ever."

Industrial Brandon

Manitoba City Serves a Rural Population Of Some 206,000

Mr. W. Burton Hurd, Professor of Economics at Brandon College, points out in a general industrial report that Brandon serves a rural population of about 206,000 in Western Manitoba and Eastern Saskatchewan, aided by a network of good roads, three main railway lines and 26 branch lines. The value of Brandon's manufactured goods exceeds \$4,250,000 annually. These include 16 different kinds of vegetable products and 19 from iron and steel. Brandon's population, as at April, 1931, was 17,776.

Gas in the Stomach Is Dangerous

Recommends Daily Use Of Blasted Magnesia To Overcome Trouble Caused By Acid Indigestion

Gas in the stomach accompanied by a full, bloated feeling after eating are almost certain evidence of the presence of excessive hydrochloric acid in the stomach, creating so-called "acid indigestion."

Acid stomachs are dangerous because too much acid irritates the delicate lining of the stomach, often leading to gastritis accompanied by serious stomach ulcers. Food ferments and sours, creating the distressing gas which distends the stomach and hampers the normal functions of the vital internal organs, often affecting the heart.

It is the worst of folly to neglect such a serious condition or to treat with ordinary digestive aids which have no neutralizing effect on the stomach acids. Instead get from any druggist a little Blasted Magnesia and take a teaspoonful or four tablets in water right after eating. This will drive the gas, wind and bloated right out of the body, sweeten the stomach, neutralize the excess acid and prevent its formation and there is no sourness, gas or pain. Blasted Magnesia (in powder or tablet form—never in liquid or milk) is harmless to the stomach, inexpensive to take and the best form of magnesia for stomach purposes. It is used by thousands of people who enjoy their meals with no more fear of indigestion.

A Promising Industry

Hundred Acres Of Peas Nets Manitoba Farmer \$4,000

One of Western Canada's youngest but most promising industries was closed this season on February 11, when a final shipment of two cars of dried field peas from St. George's, Man., were billed to an eastern soup manufacturing concern.

The Pioneer Growers at St. George's realized a yield of 40 bushels to the acre with an aggregate yield of 4,000 bushels, selling at a cash price of one dollar a bushel F.O.B. cars.

One of the most effective vermifuges on the market is Miller's Worm Powders. They will not only clear the stomach and bowels of worms, but will prove a very serviceable medicine for children in regulating the infantile system and maintaining it in a healthy condition. There is nothing in their composition that will injure the most delicate stomach when directions are followed, and they can be given to children in the full assurance that they will utterly destroy all worms.

Alberta Sheep

Sheep Population Of Western Provinces Placed At 520,000

According to Dr. F. W. Gershaw, Member of Parliament for Medicine Hat, there are about 520,000 sheep in Alberta, the northern sections breeding on a smaller scale than the more southerly areas, where extensive ranching operations are carried out. As one man can herd 1,200 to 1,500 sheep, that number, or some multiple of it, constitutes an economic unit. The sheep population of the whole of Canada is about 4,000,000.

Wretched From Asthma. Strength of body and vigor of mind are inevitably impaired by the visitations of asthma. Who can live under the cloud of recurring attacks and keep body and mind at their full efficiency? Dr. J. D. Kellogg's Asthma Remedy dissipates the cloud by removing the cause. It does relieve. It does restore the sufferer to normal bodily trim and mental happiness.

Infinitely Better

A suburban gentleman who raised strawberries invited a number of boys in the neighborhood to a strawberry party. When they had all partaken of the luscious berries, he said to them "Now wasn't that better than stealing into my garden and helping yourselves?"

"Oh, yes sir," chorused the boys. "And why was it better?" he asked desirous of pointing a moral.

"Because," said a chubby faced youngster, "we shouldn't have had any sugar and cream with 'em."

A Northern Romance

Eskimo Couple Elope From Native Village In Furious Blizzard

People who believe the thrill of romance runs more wildly through the blood of the people of warm southern climates should listen to the story of Sholeck, full-blooded young Eskimo hunter, who arrived at Churchill the other day with his bride from 480 miles north.

The young couple, who were united at Churchill by an Eskimo chief, fled from their native village far along the barren coast of Hudson Bay by dog team in the teeth of the worst blizzards that have swept the northern Arctic tundra for years. The disapproval of the father of the young bride and his power, as chief of the tribe, to forbid the marriage, did not daunt the two.

Waiting until they were positive no one was watching them, and that their trail could not be picked up in the snow, they set off on the long trip down the coast to Churchill, where another Eskimo chief would marry them.

They arrived after spending two weeks in travel. Food was running low and two of the huskies were being carried in the sleigh with the nice-looking bride. The story of the romantic elopement was told to whites through an interpreter. The pair do not plan to return to their former home, but will leave shortly for ports farther inland.

Persian Balm is alluringly fragrant. Adds a charming refinement to the most finished appearance. Creates and preserves complexions of surpassing loveliness and texture. Softens and whitens the hands. Cools and dispels all irritation caused by weather conditions. Swiftly absorbed by the tissues leaving never a vestige of stickiness. A peerless toilet requisite. Invaluable to all women who care for elegance and distinction.

Dust free air does not exist anywhere in nature.

Only one woman is affected by color blindness to each ten men.

Cuba expects its present sugar crop will be over 3,000,000 tons.

Seek Lost Girl

White Girl Living Among Aboriginal Tribes In Australia May Be Found

A white girl who for nine years has been living among a tribe of little known aborigines in the wilds of Northern Australia was sought recently on basis of rumors filtering back to civilization.

Reports that the beautiful young girl, about 18 years old, had been seen recently resulted in organization of an expedition to penetrate the wilds.

The reports were given substantiation by other reports which followed sinking of the Australian trades commission yacht "Douglas Mawson" in 1923. At that time it was said a woman and her 9-year-old daughter had survived and had made their way to the village of the native aborigines about 400 miles east of Port Darwin. Subsequently the mother was reported to have been killed by the natives and the girl kept captive.

A Queer Profession

London Man Had Wide Reputation As Professional Toastmaster

William Knightsmith, for 40 years the most prominent professional toastmaster in Great Britain, is dead. He was 73 years old.

Knightsmith started life as a dancing instructor and eventually acquired a wide reputation for his ability to conduct the formalities of after-dinner proceedings. Arrayed in a scarlet coat, black knee breeches and buckled shoes—the uniform was his own creation—his voice powerful yet decorous, he would still the largest company chattering over coffee.

His Reference

A Nigerian district officer, finding his steward unsatisfactory, discharged him. Tom asked for a reference so the district officer gave him the following:

"Tom has been my steward for 10 months. He says he wants a good berth. Anyone who is looking for a good steward should give Tom a wide one."

When you
**CAN'T
QUIT**

A HEADACHE is often the sign of fatigue. When temples throb it's time to rest. If you can't stop work, you can stop the pain. Aspirin will do it, every time. Take two or three tablets, a swallow of water, and carry on—in perfect comfort.

Don't work with nerves on edge or try all day to forget some nagging pain that Aspirin will end in a jiffy! Aspirin can do you no harm; just be sure that it is Aspirin with Bayer on each tablet.

In every package you'll find proven directions for headaches,

colds and sore throat; neuralgia, neuritis, etc. Carry these tablets with you, and be prepared. To block a sudden cold on the street-car; quiet a grumbling tooth at the office; relieve a headache in the theatre; spare you a sleepless night when nerves are "jumping."

And no modern girl needs "time out" for the time of month! Your little box of Aspirin tablets is sure relief for all such pain.

Take Aspirin for any ache or pain, and take enough to end it. It can't harm you. At drug stores everywhere. Made in Canada.

Found In Many Parts Of Canada, Limestone Regarded by Geologists As World's Most Useful Rock

Limestone, which is obtainable in more than 1,500 localities in Canada, much of it of fine quality, is regarded by geologists as the world's most useful rock. It is of immense value to man and to all living creatures in a variety of different ways; in fact, there is scarcely a phase of human life in which limestone does not play a part. Calcium carbonate, or carbonate of lime, the principal constituent of limestone, is absolutely necessary for the growth of human beings and animals. It is obtained from eggs, milk, fruit, vegetables and other food products.

To the industrial life of the country limestone is indispensable. The annual production of Canadian quarries, according to the latest available figures is 12 1/4 million tons, which, when made into its primary purposes, has a selling value of about \$34,000,000. This value is exceeded only by that of coal, copper and gold.

Limestone is used in great quantities in the form of crushed stone for highways, railway ballast and concrete aggregate. It is the principal raw material in the manufacture of Portland cement; and also in the manufacture of calcium carbide and cyanamide, which latter are the bases of many chemical products. The iron and steel industry, as at present constituted, could not exist if limestone were not available to free the iron from its ores. In the production of gold, silver and other metals, lime and limestone play important parts. Quantities of lime are used in tanning leather. Limestone is indispensable to the pulp and paper industry—every piece of paper is made by its aid. So, too, does the glass industry require limestone for most of its products—particularly for window glass. Limestone is essential to the manufacture of washing soda, baking soda and many other chemicals. Large quantities are used in the refining of sugar. The uses of lime for plaster, mortar and whitewash are generally known. When limestone is pulverized and mixed with linseed oil it is known as putty. Pulverized limestone is also used in the compounding of rubber for footwear and flooring. It is used in oil cloth and in cold-water paints. Some cigarette papers contain as much as 30 per cent. pulverized limestone. Limestone is a source of carbon dioxide gas which, when compressed into the solid state, forms the refrigerant known as dry-ice, now coming into wide use. A certain type of limestone when melted in a small blast furnace and blown by high-pressure steam into myriads of fibres, yields a fluffy material known as rock wool—one of the most efficient insulating materials on the market.

Many other uses for limestone could be mentioned, for they number hundreds, but one of the most interesting and certainly the most spectacular use of limestone is its use as a building stone. Canadian limestone for building purposes is notably superior.

One Explanation

Teacher: "Why did Joseph's brother put him in the pit?"

Boy: "Because he had on a coat of many colors, sir."

Teacher: "What had that got to do with it?"

Boy: "Please, sir, if he'd had on a dress suit they would have put him in the stalls."

Yugo-Slavia may limit its lumber output.

"Goodness, I believe my hair is beginning to fall out."—Esquella, Barcelona.

New Western Fur-Bearer

Polecats Exhibited At Winnipeg At Annual Fitch Show

The fitch (or polecat) is now definitely on the list of Canada's domesticated fur-bearers, and Winnipeg is the first city in North America to stage an annual show—the recent exhibition of the Canadian Fitch Breeders' Association being the pioneer event of its kind on the continent. The animal is reported to be a native of Asia and Eastern Russia, but it thrives well in Manitoba, where climatic and other conditions are to its liking. Prize-winning fitch from the Edinburgh Exhibition and from the International Fur Show at the Crystal Palace were on view in Winnipeg.

By Annette

THIS LITTLE MODEL IS VERY CHARMING

Smart and in the newest feeling is this simple all-day type. And you can't find anything easier or quicker to fashion.

It has the one-sided rever and the modish insets to give contrast to the sleeves.

The skirt, you will note, has the bias seaming, so entirely slimming, lending the figure graceful height and youthfulness.

The original carried out the chic idea of black and white in a soft canton crepe.

Sheer woollens are also suitable. Style No. 842 is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Size 16 requires 3 1/2 yards of 39-inch material with 1/2 yard of 35-inch contrasting.

Spring is the most important, the most colorful season in Fashions. All the more reason why you should have an authentic guide, such as our new Fashion Magazine, to show you the way in design, colors, etc. Of course, there are styles for afternoons, for stouts, for home wear, lingerie, children, etc.

Price of book 15 cents. Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Farmers Should Advertise

Sale Of Products Might Be Stimulated By Co-Operative Action

Dr. G. I. Christie, President of the Ontario Agricultural College, who is a close student of agriculture in all its ramifications, and who is in close touch with the farmers all over the province, has provided some food for thought in his suggestion that the sale of farm products might be stimulated by some intelligent advertising.

"If it pays industry to take full page advertisements," says Dr. Christie, "someone should find a way in which newspapers and other advertising mediums can be utilized for the farmers, for it must be left to the individual farmer." It is a well recognized fact that co-operative buying and selling among the farmers, fruit growers, etc., has been exceptionally satisfactory, a striking example being the California orange growers. Their policy of co-operation in the marketing of their products, which included advertising on a very large scale, brought results far beyond their expectations, and others have followed in their footsteps.

What has been accomplished in California through co-operative effort that utilized to the utmost degree advertising to sell orange juice and oranges can be accomplished by the facilities afforded by newspaper farmers of this province in popularizing the products they have for sale.

This question is large enough and important enough to arrest the attention of every farmer. It must be admitted that one farmer or even any small group of farmers cannot hope to accomplish much in this direction, but Dr. Christie is right when he points out the possibilities of intelligent advertising and farmers' organizations could do worse than investigate the chances that co-operative effort offers as a means of creating greater sales for farm products. —Owen Sound Sun-Times.

Empire Cabinet

Believe Move Would Be A Valuable Institution At The Present Time

London newspapers have suggested an Empire cabinet, comprising a representative of each dominion and two or three British statesmen, would be a valuable institution at the present time.

The newspapers reached this conclusion in editorials which discussed the appointment of Rt. Hon. Stanley Melbourne Bruce, assistant treasurer of Australia, as "minister representing the commonwealth" at London, England.

Sir John Marriott, noted constitutional authority, in an interview said he hoped Mr. Bruce would remain a member of the Australian cabinet during his stay in London. He suggested the addition of Hon. G. Howard Ferguson, Canadian High Commissioner; Rt. Hon. J. G. Coates, Minister of Public Works for New Zealand, and General Jan Christian Smuts, leader of the opposition in the South African House of Assembly, to form the nucleus of a "real Imperial executive."

First Target of Japanese

British soldiers shown detraining at the railroad station of Woosung Fort, on the outskirts of Shanghai. This fort was the first target of Japanese forces in the move for the occupation of Shanghai. Claiming that they were fired on from the fort, Jap warships shelled the stronghold and silenced it. The British Tommies shown here are defending the international settlement.

Suggestion Now Advanced That Western Canada Will Soon Have Reached Wheat Growing Limit

That the prairie provinces are approaching much more closely than people suspect their peak point in wheat production and exports, was the feature of an address before the Royal Canadian Institute in Toronto recently by Dr. D. A. MacGibbon, Winnipeg, member of the Board of Grain Commissioners. A possible maximum wheat crop in western Canada of between 670 and 700 million bushels was calculated.

Observing the rise of wheat production in Ontario and Quebec in pioneer days and the decline following this period, Dr. MacGibbon suggested that western Canada will pass through the same phases, production rising to a peak and which, with the passing of the pioneer, will gradually decline to a fairly fixed level.

He pointed out the almost uniform progress in acreage devoted to wheat during the last 25 years, concluding that a study of the facts gave no reason to suppose that the limits of wheat cultivation have yet been reached. In this respect Alberta, Dr. MacGibbon stated, only began to show promise as a wheat producing province in 1910. Saskatchewan produced widely fluctuating volumes from year to year, but with a steady advance in the acreage, while Manitoba in contrast had produced her largest crop of wheat in 1915 and a decline in her acreage in wheat has been under way for six or seven years.

Between 1910 and 1914, the speaker continued, 57 per cent. of the acreage devoted to field crops in Manitoba was planted to wheat while for the five years, 1926 to 1930 inclusive, the percentage shrank to 37 per cent. with an average crop of about 40 million bushels. In contrast to Manitoba a study of the proportion of wheat lands to total land devoted to field crops in the three prairie provinces shows that between 1910 and 1914 the percentage was 57 per cent. devoted to wheat and between 1926 and 1930 the percentage was 63 per cent.

These facts indicate, he continued, that any expansion in wheat acreage must take place in Alberta and Saskatchewan where pioneer settlement is still going forward and where price relationships of wheat to other farm crops have been, at least until recently, out of their normal alignment.

Probable limits of acreage for wheat production in these two provinces and the potential yield were then outlined. Believing it quite incorrect to assume that there are still vast areas of virgin soil to be taken up, Dr. MacGibbon pointed out that the Saskatchewan Commission on Immigration of 1930 examined the question of available lands and estimated that the remaining area of arable soil in that province could not exceed 12 million acres, and that

it would require many years to bring this land under cultivation. Assuming this figure correct and computing from Saskatchewan's record crop of 321 million bushels of wheat in 1928 from 46 million acres of occupied farm land he showed a probable maximum yield of 405 million bushels or 85 million additional from the 12 million acres yet to be added.

Present occupied farm lands in Alberta amount to 29 million acres. Recent surveys show there is an outside possibility of seven million acres capable of being used for wheat production in the Peace River country. Of this about 60 per cent., it is estimated, can be used for wheat production. Consequently the largest wheat crop in Alberta to date, namely 171 million bushels may, by the same rough methods applied to Saskatchewan, be raised by 40 million bushels, making a total for all the provinces of between 670 and 700 million bushels.

Factors in support of a larger figure than this were outlined by Dr. MacGibbon, among which were the use of fertilizers to increase yields, mechanized farming methods reducing areas needed for feed crops and releasing of land for wheat, price relationship favoring production of other cereals and increasing wheat, and the work of the plant breeder who may produce wheats capable of developing on soils now deemed sub-marginal. On the contrary Manitoba is on the downward trend, large areas in Saskatchewan and Alberta now used for wheat production do not produce wheat of the highest quality, and as these two provinces pass out of the pioneer stage farmers will cease to devote these lands to wheat, but to mixed farming for which they are technically suitable.

After Alberta and Saskatchewan reach the point of maximum production there will be a considerable decline just as there has been in Manitoba, Ontario, Minnesota and elsewhere, Dr. MacGibbon concluded. Where the volume of production will be stabilized in that event would depend upon at least two factors, the very large areas in each province which were better suited to the production of wheat than any other product and the very high quality of the wheat which is produced in these areas.

Canada's Part In Great War

No Official History Has Yet Been Published

"The Canadian Legion, of the British Empire Service League, is in daily receipt of inquiries from all over the country as to when Canada's official history of the Great War is to be published," said Major John S. Roper, M.C., K.C., president of the Legion at Ottawa.

Major Roper, commenting upon the publication of battalion war histories, deplored that beyond one supplementary volume issued by the government several years ago, dealing with the Medical services, nothing had been written on the operations of the Canadian corps. Other countries had published voluminous accounts—notably Great Britain and Australia—but on Canadian achievements in the great struggle Canada continued to preserve absolute silence.

Nearly two tons of copper coins were collected by Cambridge, England, students in a one-day drive for funds for ex-soldiers.

WORLD HAPPENINGS BRIEFLY TOLD

It would cost \$2,193,000 to construct the Mafeking cut-off in Manitoba to the Hudson Bay Railway, the House of Commons was informed.

More than \$10,000 has been raised by Calgary Chinese to aid their brethren in China defend the nation against the Japanese.

Immigration from Canada during 1931 dropped 77.1 per cent. compared to the previous year. A total of 31,877 Canadians were admitted.

Ferdinand Edouard Buisson, 91, long a noted worker against war and holder of the Nobel prize, died a short time ago at Beauvais, France.

The last of three royal air force aeroplanes, forced down in a blizzard in the Syrian desert, was found north of Imtan, with all the occupants safe.

There are more than 100 candidates in line for the 10 travelling research fellowships to be awarded this spring by the Royal Society of Canada.

The shipping world understands a situation has developed favoring a profitable deal with Canada whereby Great Britain would exchange British coal for Canadian wood.

Mayor Davison has been informed the Royal Canadian Mounted Police force will not police the City of Calgary. This will be up to the city police force.

An autographed letter written by Lord Nelson to the lords of the admiralty five weeks before his death when auctioned recently brought about \$100.

Dr. Hugo Eckener announces the Graf Zeppelin would make four trips to South America during March, April and May. Six other trips, as yet undesignated as to termini, are planned.

Eskimos Quite Modern

Have Radios, Like Jazz, and Play Contract Bridge

A little while ago an eminent traveller and explorer assured us that the Eskimos do not live in snow igloos. Now comes the Bishop of the Arctic and assures us that the Eskimos play bridge—and contract bridge at that.

Well, there is, after all, no reason why Eskimos should not play contract bridge. They have radios and they dance jazz. They have a sense of humor—and a good bridge player needs that. They are not given to sudden fits of anger—and that is a good quality in contract bridge.

SUNDAY SCHOOL LESSON

FEBRUARY 28

JESUS RAISES LAZARUS FROM THE DEAD

Golden Text: "I am the resurrection and the life; he that believeth on Me, though he die, yet shall he live."—John 11:25.

Lesson: John 11:1 to 12:11.

Devotional Reading: 1 Corinthians 15:50-58.

Explanations and Comments

Jesus Talks With His Disciples About Going To Bethany, verses 7-11.—"Let us go into Judea again," said Jesus to His disciples, but they remonstrated with Him because of the danger, for the Jews there had so recently sought to stone Him. Jesus answered them that His life was safe as long as God had work for Him to do, and added that he must go to awaken Lazarus. His disciples took His words literally; if Lazarus was sleeping, he would recover. Then Jesus told them plainly that Lazarus was dead; for the sake of their faith, He said. He was glad he had not been there. Now they must go with Him. And despondent Thomas said loyally and bravely to the others, "Let us also go, that we may die with Him."

The Meeting Of Jesus and Martha, verses 12-27.—When Jesus reached the neighborhood of Bethany, Lazarus had been in the tomb four days, for burial took place on the day of death, as it still does in that land. Martha met Him on the way and exclaimed in her sorrow, "Lord, if Thou hadst been here my brother had not died." And then she added, "Even now I know that whatsoever Thou shalt ask of God, God will give Thee." "Thy brother shall rise again," returned Jesus. "Yes, in the resurrection at the last day," Martha answered, but she found little comfort in that hope of the far-distant future. I am the Resurrection and the Life," solemnly Jesus affirmed; "those who die believing on Me shall live through My life-giving power; and over the eternal life within the living who believe on Me, death shall have no dominion. Believest thou this?" "Thou art the Christ, the Son of God," answered Martha; His power she would not limit.

The Meeting Of Jesus and Mary, verses 28-32.—Martha hurried back to Bethany to summon Mary with the glad words, "The Teacher is here, and calleth thee." When Mary started up quickly to meet Jesus, her friends (some of them were from Jerusalem), thought that she was going to the tomb of Lazarus to weep there, and they followed her. On reaching Jesus she fell at His feet and spoke the same words that Martha had spoken, the thought that had been in their minds constantly since their brother's death, "Lord, if Thou hadst been here."

The Sorrow Of Jesus, verses 33-37.—Jesus was troubled by Mary's weeping and that of the Jews who had come with her. "Where have ye laid him?" He questioned. "Come and see," they returned. Jesus wept. His tears were an expression of that divine sympathy which draws all sorrowing hearts to Him.

Jesus Restores Lazarus To Life, verses 38-44.—The tomb was a cave with a stone before the opening. Jesus ordered the stone to be removed, but Martha objected, reminding Jesus that Lazarus had been dead four days and by this time the body was decaying. Jesus was now face to face with the impossible, she thought; death and corruption had made His healing power of no avail. "Said I not unto thee," exclaimed Jesus, "that if thou believest, thou shouldst see the glory of God?" The stone was taken away. And Jesus lifted up His eyes and said "Father, I thank Thee that Thou hearest Me." His prayer for power had been offered, perhaps when first He heard of Lazarus' sickness, and now He is sure that God has answered that prayer, sure that He can bring Lazarus back to life, and in advance of doing this He thanks His Heavenly Father for hearing Him. "I knew that Thou hearest Me always," continued Jesus, "but because of the multitude that standeth around I said it, that they may believe that Thou didst send Me."

Then with a loud voice Jesus cried, "Lazarus, come forth." And Lazarus came forth.

An Interesting Discovery

Petrified Apples Have Been Found By Farmer In Alberta

While fossilized palm leaves, figs and fig leaves have been uncovered in southern Alberta, as proof that around 70,000,000 years ago this part of the west was a tropical land where the dinosaurs roamed, yet it was not until last month that petrified apples have been unearthed.

This discovery was made by a farmer digging a well in the Olds district, who unearthed petrified apples on a petrified branch of the ancient tree. The Calgary museum has been notified of the discovery and the well has been refilled with earth to await further excavation work by experts in this branch of research.

Too Sick for School

Mrs. Dow Says Dr. Williams' Pink Pills Restored Daughter to Health.

Never
Misses Day
From School.

"My daughter was rundown in health, took weak spells and could not go to school," writes Mrs. Asa Dow, Port Daniel West, Quebec. "While visiting her aunt, a friend told her about a little girl in similar condition who had been completely restored to health by Dr. Williams' Pink Pills. My daughter has since been taking the Pills, and they have certainly made her stronger. She has lost that tired, sluggish feeling and has never missed one day's school since September. The Pills also gave her a good appetite; her nerves are better and she has more pep. I recommend Dr. Williams' Pink Pills to mothers of daughters with similar troubles." "Don't let anaemia rob your growing daughter of health and vigor. Give her Dr. Williams' Pink Pills. They are no temporary relief. They banish the condition by creating new blood which imparts health, vigor and vitality. Equally good for all rundown or nervous conditions. At your druggist's. 50c. 274

Fine Laboratory Plant

Has Been Completed

Building At Ottawa To Be Opened This Spring.

Theoretical science will be linked to the practical demands of commerce and industry by the new \$3,000,000 laboratory plant of the National Research Council, built and equipped by the Dominion Government, which will be put into service soon and will be formally opened with appropriate ceremonies in the spring during the annual meeting in Ottawa of the Royal Society of Canada.

The dominating purpose of the National Research Council is to provide the necessary link between "pure science as taught in the universities and the scientific requirements of industry; in other words, to find a practical value for applied science. Although much has been accomplished in the past, the work of the council has been limited by lack of adequate facilities. That difficulty is now being removed.

DRAPERIES MADE NEW

"When we resumed housekeeping a month ago I found my draperies had become creased from packing. I hung them out on the line, hoping to remove the creases. Then I forgot them. The result was they became badly faded and sun-spotted."

"I was heartsick until the happy thought struck me to dye them. I just dyed them a deeper green, and as I used Diamond Dyes they look gorgeous and new. I have never seen easier dyes to use than Diamond Dyes. They give the most beautiful colors—when used either for tinting or dyeing—and never take the life out of cloth as other dyes do."

Mrs. J.F.T., Montreal.

The Ownership Of Trees

Classed As Real Estate Of Town Or Village

Who owns the trees that flourish on the streets or on the roads of a municipality? They are the real estate of the town or village or township, and as such may not be disposed of by the ipse dixit of a councilman, nor by the whole council except under the strict rules that are laid down for the disposition of other town property. Trees may improve the value of property along a street so that the owners would receive a distinct loss by their removal. The laws of England, of most of the States of the Union, and of Canada give protection to the owners in such a case. Of course, trees may be removed for an important public reason.

Extend Library Privileges

Public Library Commission For Saskatchewan May Be Established

Establishment of a public library commission for Saskatchewan, with the co-operation of the Carnegie institute, is a development which may be expected in the province within the next few months.

Recently, representatives of the Carnegie institute visited Regina and met members of the provincial government, and it was learned that consideration is now being given to a plan which would bring to the residents of all the rural sections a book-lending system not possible at present.

The plan, it is learned, provides for a substantial financial grant from the Carnegie institute to the province, controlled by a commission in charge of the library extension work. This commission would work in co-operation with the open-shelf library and travelling library branches of the provincial public service and the system would permit the distribution of books into every rural section of the province.

Canadian Wheat Exports

Summary Of Movement Of Grain To United Kingdom Given In Report

Wheat exported during the month of January totalled 9,472,346 bushels, valued at \$5,817,082, compared with 9,608,862 in January, 1931, valued at \$6,430,682, according to a report issued by the Dominion Bureau of Statistics. The amount sent to the United Kingdom was 5,289,568 bushels compared with 2,818,988 bushels in the corresponding month of last year.

In the six months ending January, 1932 the total wheat export was 104,450,432 bushels, compared with 138,297,729 in the same month of 1931.

Wheat flour export in January totalled 331,806 barrels valued at \$1,171,870, compared with 392,256 barrels at \$1,558,509 in January, 1931. The six months export was 2,896,805 barrels at \$9,970,107, compared with 3,961,694 at \$17,714,234 in the same period a year ago.

Scientists Are Busy

Scientists of nearly a score of nations are completing arrangements for the widest investigation ever made into the scientific and meteorological mysteries of the polar regions. The second "polar year" begins August 1 next, and a group of "weather men" in Toronto are toiling daily to conclude details of the great part Canada is to take in the new invasion of the top of the world.

Captain Kidd, the pirate, was sent out from England to capture pirates and turned pirate himself.

MAD TRAPPER IS KILLED BY POLICE POSSE

Aklavik, N.W.T.—Albert Johnson finally came to the end of his blizzard trail. The wild man of the Arctic went down fighting, but Canada's red-coated Royal Canadian Mounted Police won out.

Battling cold, hunger, blizzards and overwhelming odds, the eccentric trapper defied the police for eight solid weeks, now running through the bleak hills of the Arctic, now standing at bay and shooting down his pursuers if they came within range of his deadly rifle.

When his fate overtook him, Johnson was perpetrating one of the foxy, trail-muddling tricks with which he has managed to keep out of range of the police and trapper pursuers. He was doubling back on his trail. This time, however, his pursuers were too close.

He was seen by Staff Sergeant E. F. Hersey, and a trapper named Noel Verville, plugging along in advance of the main posse. Hunter and hunted at once prepared for a gun battle. Hersey and Verville jerked their rifles from their toboggan.

The wild man drew first blood. As Hersey knelt to take aim a bullet from Johnson's rifle struck him in the knee, glanced up through his thigh and another entered his chest. Verville continued firing.

Only a few shots had been exchanged when the main police party, hearing the firing, ran up. They opened fire at once and the desperado went down under a hail of lead from half a dozen rifles.

While the battle raged on the ground, Pilot W. R. "Wop" May circled overhead in his plane. He had bombs ready to drop on the trapper but could not use them as the posse was too close.

As soon as Johnson was killed, May landed, picked up the wounded Hersey and flew back to Aklavik.

In all the long years of police work in Canada's Arctic no other man has proved as tough a customer as Johnson. The police casualty list now stands at one dead, two wounded. Every policeman in the district, members of the Royal Canadian Signals Corps who operated the radio station here, trappers and Indians were pressed into service in the chase. They gave their services gladly, knowing the country was safe for no man while Johnson was still at large.

The straight-shooting hermit carries with him to his death the secret of his strange behaviour. Since he first appeared in the Rat River country not far from where the mighty Mackenzie River empties its waters into the frozen mass of the Arctic Ocean he has shunned all human contact.

Making his home in a little cabin on the side of a hill, Johnson started trapping. As men passed by on the lonely Arctic trails they occasionally called on him, for the Arctic wanderer likes to see a fellow-man once in a while. But Johnson received them coolly. He slammed his door in their faces, and seemed to hate the sight of other men. A sturdy-built man of medium height, the hermit appeared to be about 40 years of age. He spoke with a slight Scandinavian accent, and always appeared well-supplied with money for the purchase of ammunition and supplies.

The most that he ever told anyone about himself was that he had walked into the country from the Yukon.

Thus he lived his solitary life. For in the Arctic men mind their own business and when they learned Johnson's desire to be alone they respected it.

Continue Low Fares

Montreal, Que.—Low week-end round trip fares, which have been offered by the Canadian National, Canadian Pacific and other railway lines in the Dominion since last summer, will remain in force after February 29, the date originally set for their discontinuance, the Canadian Passenger Association announced.

W. N. U. 1930

Offer War Services

Canadian Aviators Ready To Face Dangers In Chinese Battle Front

Ottawa, Ont.—Ready to face the dangers of aerial battle in far away China, 80 officers of the Royal Canadian Air Force, soon to be released from the service, have offered their services to Li Tchuin, Chinese consul-general in Canada.

The Canadian officers, who are offering their services to China in the battle against Japan, are being released by the Dominion Government due to general reductions in the estimates for the defence department. The officers now are posted at the Ottawa, Trenton and Vancouver air stations.

The consul-general, however, has had no instructions from his government to engage airmen in Canada, though the offer, no doubt, will be transmitted to the Chinese authorities at Nanking, present seat of government.

"I have no instructions or authority to engage any military instructors, air pilots or any other ranks," said Li Tchuin. "We have had many offers by Canadians to serve in the Chinese army, though today's is the largest by any one group."

Flying Officer F. N. Brooks, a member of the group, stated the offer to the consul-general was made entirely on the officers' own responsibility, without any knowledge or consent of the Canadian Government or the Department of National Defence.

Maximum Working Day

Conference Will Be Called To Discuss Eight Hour Agreement

Ottawa, Ont.—The Dominion Government will call a conference with the provinces "as soon as conditions warrant such a conference being satisfactorily held" to discuss a maximum working day of eight hours called for in the treaty of Versailles to which Canada is a signatory. In a listless debate, with all quarters of the Commons in general agreement, Hon. Hugh Guthrie, Minister of Justice, made his announcement in the House of Commons.

Debate was initiated by Hon. P. Heenan (Liberal, Kenora), who in a resolution advocated "appropriate action" for establishment of the eight-hour day. The Versailles Treaty, he recalled, had been signed in 1919 by Sir Robert Borden, and subsequently the eight-hour day principle was adopted at a conference in Washington. A question of jurisdiction had arisen in Canada, but as the eight-hour principle had been put into operation on Dominion Government works in 1930 the Dominion administration should approach the provinces for compulsory legislation throughout Canada for an eight-hour day.

War Strength Of Russia

Figures Given To League Of Nations By Soviet Government

Geneva, Switzerland.—The Soviet Government told the League of Nations and the Disarmament Conference that the Red army numbered 504,393 men. The Red air and naval forces, the report said, had 28,000 and 29,000 men respectively.

The total tonnage of the navy was placed at 160,000, including 71,000 tons of capital ships, and the air force had 750 planes.

The Ogpu (Soviet secret police) guards had 45,000 in its rolls.

Russia spent a total of 1,290,000,000 rubles (roughly \$645,000,000) on all its armed forces in 1931.

Probe Gordon Charges

Special Committee For This Purpose Has Been Appointed

Ottawa, Ont.—The special committee which will investigate charges and allegations made by Hon. G. N. Gordon, former deputy speaker of the House of Commons, said to reflect on the Prime Minister, has been appointed.

On motion of Hon. Hugh Guthrie, Minister of Justice, the following were appointed: G. R. Geary (Cons., Toronto South); Onesime Gagnon (Cons., Dorchester); J. L. Bowman (Cons., Pictou); William Duff (Lib., Antigonish-Guysboro); C. B. Howard (L., Sherbrooke), and Alfred Speakman (U.F.A., Red Deer).

TESTING PROGRESS

Dr. J. A. Ruddick, Dominion Dairy Commissioner, is authority for the statement that cow testing has shown much more progress in Saskatchewan and British Columbia, than in any other Canadian province.

Tidal Wave In Alaska

Catastrophe Overtakes Native Eskimo Villages With Great Loss Of Property

Fairbanks, Alaska.—Great damage resulted from tidal waves which swept over the western Alaska coast from the Kuskokwim river delta northward and spread many miles inland, Clark M. Garber, superintendent of the Indian Affairs Bureau, said here. He has been over the territory and reported no loss of life.

Word of the catastrophe seeped out of the inaccessible section a few days ago and Garber's account is the first authentic word picture drawn of the great mountains of ice that descended upon the native villages.

The blocks of ice, he said, crushed igloos, cabins, fish caches and destroyed fish, the principal source of food for the natives. The water flooded the igloos to a depth of four or five feet, trapping the occupants who had to escape through the skylights. Adding to the terror among the Eskimos was the fact the waves came at night, giving the natives little or no chance to save their possessions.

He said probably 2,500 persons were affected, all of whom would be in dire straits for the remainder of the winter because their dried fish supply was destroyed and hunting equipment was lost.

Mr. Garber said he believed relief work could be carried on adequately by the Indian affairs office with the assistance of reindeer supervisors.

Peace River Outlet

No Justification For Building Here Is Opinion Of Railway Expert

Ottawa, Ont.—"No western outlet is justified for the present, as the existing railways furnish the most economical route," is the conclusion of J. M. R. Fairbairn, chief engineer of the Canadian Pacific Railway, and his conferees on the committee appointed by Hon. R. J. Manion, Minister of Railways, to enquire into the Peace River outlet. "It will take many times the present traffic to justify another railway outlet," says the report, which was tabled in the House of Commons.

FRANCE AND ITALY REOPEN NAVAL DISCUSSION

As a result of the efforts of the World Disarmament Conference direct negotiations have been begun between the French and Italian delegations to settle their naval differences. French Minister of War, Andre Tardieu (left) and Foreign Minister Dino Grandi of Italy (right), have already met to discuss the subject and their conversations are being followed up by the French and Italian naval experts, Rene Massigli and Augusto Rosso.

Bandits Make Haul

Trio Attack Messenger In Winnipeg and Escape With Large Sum Of Money

Winnipeg, Man.—Police cars were cruising Winnipeg streets seeking a trio of bandits who ambushed George Ridd, provincial treasury messenger, slugged him into insensibility and escaped with a satchel containing \$3,600 in cash and \$15,000 in cheques and money orders. A stolen automobile, used to whisk the marauders away, is the only clue police have to aid them. Several thousand dollars, in small packets, which Ridd carried in his pockets, were overlooked by the hold-up men.

Ridd, accompanied by Jack Campbell, provincial chauffeur, was walking from a side door to a waiting automobile with receipts from the post office, located in the government buildings. As they neared the car, two men stepped up to them and ordered Ridd to hand over the satchel.

Ridd refused and attempted to run back to the building. Anticipating this, one of the robbers thrust a gun into his side and pulled the trigger. When this failed, he promptly felled Ridd with blows to the head.

Wrenching the bag from Ridd's grasp, the bandit joined his two confederates and quickly fled the scene. The stolen car in which they made their escape was rapidly lost sight of in the haze of automobiles speeding their owners back from the mid-day meal. Ridd was immediately rushed to hospital where his condition was reported as fair. The unfortunate messenger staged a plucky fight against overwhelming odds and only his lapse into unconsciousness released his hold on the money satchel.

A Peculiar Situation

U.S. Farmers Rushing Funds Across the Line To Deposit In Canadian Banks

Halifax, N.S.—United States farmers along the border have not only been depositing their surplus cash in Canadian banks and withdrawing from their home-town institutions to make Canadian deposits, but are actually mortgaging property and rushing the proceeds across the line, according to the February 17 issue of "The Business Week," New York Commercial Journal.

"Yankees in the upper tiers of Maine, Vermont and New Hampshire," says the publication, "are taking their money from banks to deposit in Dominion institutions at a rate of \$1.18 to \$1.20. Here in the true Yankee country people see an opportunity for profitable trade—a thing always close to the Yankee heart. When the Canadian dollar recovers—as they feel sure it will—they can recall the money and cash their profits. Meanwhile deposits in Canada are drawing interest in the larger face value."

War History In School Books

Geneva, Switzerland.—At a session of the world disarmament conference, Baron Yrjo-Koskunen, Finland's Minister of Foreign Affairs, urged demilitarization of frontiers, and Foreign Minister Ghika, of Rumania, warmly supported the French plan to arm the League of Nations. He also suggested revision of school books to eliminate incitement to war.

BRISK DEBATE IN HOUSE OVER WHEAT BONUS

Ottawa, Ont.—A brisk clash between Robert Gardiner, Alberta United Farmers' leader in the House of Commons, and M. N. Campbell (Prog., McKenzie), one of his supporters, featured debate on a resolution urging a bonus of \$1 per acre seeded this year to wheat. The motion was sponsored by Robert MacKenzie (Lib., Assinibola). Western farmers appreciated greatly the existing five cents a bushel bonus. Mr. Campbell claimed; and he deplored that a United Farmers' convention had denounced it. If the government discontinued the subvention, the farmers would have their leaders to blame, he asserted.

Mr. Gardiner took issue with his supporter. The farmers who had received the five-cent bonus undoubtedly appreciated it; but the distribution of the money did not reach those whose crops had been destroyed either by hail or drought. They believed themselves entitled to some other consideration, and were favorable to a subvention such as suggested in the resolution. If Mr. Campbell visited thees dried-out areas he would be in a better position to appreciate the distress prevailing there. The U.F.A. convention's resolution was fully endorsed and would be presented to the government in due course.

Mr. MacKenzie's resolution read: "Whereas the policy of extending federal assistance to western farmers on a bushel basis rather than on an acreage basis has worked out most unfairly and unjustly to the residents of those districts suffering from failure or near failure of crops;

"And whereas a largely signed petition and memorandum has been presented to the government by the secretary of the Saskatchewan Association of Rural Municipalities, praying for additional legislation to partially remedy the situation that exists;

"Therefore be it resolved: That, in the opinion of this House the Government should give immediate consideration to a more equitable and less discriminatory solution of this problem."

Brief speeches, delivered for the most part by western members, characterized the debate.

Urges Construction Of Bridge

C. R. McIntosh Asks Royal Commission To Consider Request

Ottawa, Ont.—Meetings "in camera" of the Royal Commission on Transportation have been held here, and so far no further public sessions have been scheduled. At the last of these representations were heard from the Ontario Motor Coach Operators Association.

C. R. McIntosh, Liberal member of parliament for North Battleford, Sask., urged upon the commission the necessity for doing something in connection with the construction by the Canadian Pacific Railway of a bridge over the North Saskatchewan river and extension of an existing line northward from Saskatoon to North Battleford. Mr. McIntosh advanced that the completion of this line would serve a rich and rapidly developing country.

British Premier Takes Holiday

London, England.—Wearing an eye shade and a bandage over his left eye, Prime Minister Ramsay MacDonald arrived at No. 10 Downing Street, to preside over an important cabinet session. He planned to go later to his country place, Chequers, for a rest before a three weeks' holiday prescribed by his physicians.

Iceland In Air Mail Route

Reykjavik, Iceland.—Judge Gudmundur Grimason of Rugby, N.D., arrived here as a representative of the Trans-American Airlines Corporation for the announced purpose of negotiating for a proposed Detroit-to-Europe air mail service via Iceland.

Canada's Oldest Indian Dead

Nanaimo, B.C.—Nanosee Bob, after whom Nanosee Bay was named 90 years ago, who was reputed to be the oldest Indian in Canada—his estimated age being 105 years—is dead at his home on the shores of Nanosee Bay.

LOWEST PAID WORKER IN THE WORLD

She never earned any money—she
lives on a farm, but she lives on al-
most any farm. She is somebody's mo-
ther, maybe your own. She has earned
nothing. No, but she has served 439,983
meals; she has made 1123 garments;
32,000 loaves of bread and 5,390 cakes;
7,932 pies; 1,500 gallons of lard; she
has grown 1432 bushels of vegetables
and has raised 79,660 chickens; churn-
ed 5,430 pounds of butter; put up 3,625
jars of preserves; scrubbed 177,825 ar-
ticles of laundry; and she has put in
35,839 hours of sweeping and washing
and scrubbing. At accepted prices for
this work it is worth \$115,480.50. She
can't retire on her savings—she has
kept on. Not earning, no. How do you
define the ordinary woman's contribu-
tion to her family wealth?—Exchange.

Two young boys stood with their
noses pressed against Mack's barber
shop window.

"Gee, Johnny, look at that one!" said
one, pointing to Mack wielding a singe-
ing taper: "He's lookin' for 'em with
a light."

• • • • •

A Spinster living in Canal Flats was
shocked at the language used by two
men repairing telephone wires to her
house.

She wrote to the mayor on the mat-
ter, and the foreman was asked to re-
port.

This he did in the following way:
"Me and Axle were on this job. I went
up the pole and accidentally let the hot

lead fall on Hector. It went down his
neck. Then he said: "You really must
be more careful, Axel."

• • • • •

They were very much in love, but
at last there came a day when they
had a bitter quarrel and they parted,
each resolved never to see the other
again as long as they lived. Years
passed and they had almost forgotten
that little love affair, when one night
they came face to face with each other
at a dance. The man felt rather em-
barassed, but he went eagerly up to
her, nevertheless, and said softly "Why
Muriel!" She looked at him indifferently.
"Let me see," she said calmly, "was
it you or your brother who used to be
an old admirer of mine?" He was
snubbed, but he rose to the occasion.
"I really don't remember," he replied
affably. "Probably my father."—Ex.

"They're Off!"—In Old Quebec

The Eleventh annual Eastern
International Dog Sled Derby
—crowning event of the 1932
Winter Sport season—is scheduled
for February 22-24. For those
three days, all eyes turn to Quebec
City, where each day the fight
between the best dog teams in
America over a course of 40-odd
miles a day is staged. Emil St-
Godard, Leonhard Seppala, hero
of the rush with diphtheria serum
to Nome a few years back, are
among the contenders, of whom
last year there were eleven and
this year there will likely be even
more. In all, the race covers a
distance of 123 miles and the finish
is in Quebec itself through crowds
of thousands of fans, lining the
streets and cheer on the victor.

Handsome cash prizes are
awarded, but this year interest is
much above the usual. St-Godard
who has won the race four times
in the last five years, has two legs
on the Speed Cup and another win
this year will give it to him per-

manently. Seppala
has two legs on the
Gold Cup for the best
conditioned dog and
stands to win it per-
manently this year.
Prizes total \$2,150
with a first prize of
\$800; second prize,
\$600; third prize,
\$300; then \$200, \$100,
\$75, \$50 and \$25 in
that order. In addition there is the
Gold Cup for the best conditioned
dog and the Speed Cup awarded
to the team making the fastest
time for a lap during the three
days of racing.

The event winds up with the
Dog Derby Costume Ball held
at the Chateau Frontenac, the

Canadian Pacific's great hotel,
on Wednesday, February 24 at
which prizes and cups are awarded
to the winners.

The picture shows: Upper left,
typical husky, and right Chateau
Frontenac, Quebec. Below, centre,
last lap of the race and lower right
Emil St-Godard and his lead dog,
Toby.

This delicious table syrup is just full of nourishment, and costs little. Try it.

THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET PEDLER

Author Of "The Splendid Polly," "The Hermit Of Far End," "Hodder & Stoughton, Ltd., London."

CHAPTER XIII.—Continued.

She laughed and retorted impertinently:

"I'm sure I'm grateful to the bigger boy who came to the rescue."

There was something quite unconsciously provocative about her as she stood there with one foot poised on the plank, her head thrown back a trifle to meet his glance, and a hint of gentle raillery tilting the corners of her mouth.

The cave-man woke suddenly in him. He was conscious of an almost irresistible impulse to take her in his arms and kiss her. But the conventions of the centuries held, and all Jean knew of that swift flare-up of desire in the man beside her was that the grip of his hand on hers suddenly tightened so that the pain of it almost made her cry out.

And because she was not given to regarding every unmarried man she met in the light of a potential lover—as some women are prone to do—and because, perhaps, her thoughts were subconsciously preoccupied by a lean, dark face, rather stern and weary-looking as though from some past discipline of pain, Jean never ascribed that fierce pressure of the hand to its rightful origin, but merely rubbed her bruised fingers surreptitiously and wished ruefully that men were not quite so muscular.

"I'll go with you up to the house," remarked Burke, without any elaboration of "by your leave."

She was privately of the opinion that her leave would have little or nothing to do with the matter. If this exceedingly autocratic and masculine individual had decided to accompany her through the park, accompany her he would, and she might as well make the best of it.

He was extraordinarily unlike his sister, she thought. Where Judith

WIFE WAS FAT— No Longer Attractive Lost Husband's Love

The above headlines appeared in a New York newspaper, in connection with a divorce trial that has attracted wide attention.

"She was a beautiful woman," one witness testified, "but she got too fat and is not attractive any more."

Thousands of women are getting fat and losing their beauty—just because they do not know what to do.

If you are fat, why not do what thousands of women have done to get rid of pounds of unwanted fat? Take one half a teaspoon of Kruschen Salts in a glass of hot water every morning before breakfast, and keep it up for 30 days. You can help the action of Kruschen by cutting out pastry and fatty meats, and going light on potatoes, butter, cream and sugar. Then weigh yourself and see how many pounds you have lost.

Now you can laugh at the people who pay hundreds of dollars to lose a few pounds of fat, and you will know that the 6 vitalizing salts of Kruschen have presented you with glorious health.

FREE TRIAL OFFER

If you have never tried Kruschen—try it now at our expense. We have distributed a great many special "GIANT" packages which make it easy for you to prove our claim for yourself. Ask your druggist for the new "GIANT" 75c package.

This consists of our regular 75c bottle together with a separate trial bottle—sufficient for about one week. Open the trial bottle first, put it to the test, and then, if not entirely convinced that Kruschen does everything we claim it to do, the regular bottle is still as good as new. Take it back. Your druggist is authorized to return your 75c, immediately and without question. You have tried Kruschen free, at our expense. What could be fairer? Manufactured by E. Griffiths Hughes, Ltd., Manchester, Eng. (Estab. 1756). Importers: McGillivray Bros., Ltd., Toronto.

W. N. U. 1930

Craig would probably seek to attain her ends in a somewhat stealthy, cat-like fashion, Burke would employ the methods of the club and battering-ram. Of the two, perhaps these last were preferable, since they at least left you knowing what you were up against.

"Will you come in?" asked Jean, pausing as they reached the house. "Though I'm afraid everyone is out."

"So much the better," he replied promptly. "I'd much rather have tea alone with you."

"That's not very polite to the others"—smiling a little. "I thought the Staple people were old friends of yours?"

"So they are. That's exactly it. I felt the mood of the explorer on me this afternoon."

"You're one of the people with a penchant for new acquaintances, then?" she said indifferently, leading the way into the hall, where, in place of the great log fire of chillier days, a bank of growing tulips made a glory of gold and orange and red in the wide hearth.

"No, I'm not," he returned bluntly. "But I've every intention of making your acquaintance right now."

Jean rang the bell and ordered tea. "I think perhaps I might be consulted in the matter," she returned lightly when Baines had left the room. "The settling of questions of that kind is usually considered a woman's prerogative. Supposing"—smiling—"I don't ask you to tea, after all?"

There was a smouldering fire in the glance he bestowed upon her vivid face.

"It wouldn't make a bit of difference—in the long run," he replied deliberately. "If a man makes up his mind he can usually get his own way—over most things."

"You can't force friendship," she said quickly. It was as though she was defying something that threatened.

Again that queer gleam showed for a moment in his eyes.

"Friendship? No, perhaps not," he conceded.

He said no more and an uncomfortable silence fell between them. Jean was suddenly conscious that it might be possible to be a little afraid of this man. She did not like that side of him—the self-willed, masterful side—of which, almost deliberately, he had just given her a glimpse.

With the appearance of tea the slight sense of tension vanished, and the conversation dropped into more ordinary channels. She discovered that he had travelled considerably and was familiar with many of the places to which, at different times, she had accompanied her father and mother, and over the interchange of recollections the little hint of discord—of challenge, almost—was forgotten.

They were still chatting amicably together half an hour later when Blaise returned. The latter's face darkened as he entered the hall and found them together, nor did it lighten when Jean recounted the afternoon's adventure.

"I suppose Miss Peterson has your lodge-keeper's boys to thank for this?" he demanded stormily of Burke.

"I'm afraid that's so," admitted the other.

"If you had any consideration for your neighbours, you'd sack the lot of them," returned Blaise sharply. "Or else see that they're kept under proper control. They've given trouble before, but it is a little too much of a good thing when they dare to play practical jokes of that description on a guest of ours."

Jean stared at him in astonishment. She had told the story as rather a good joke and in explanation of Burke's presence, and, instead of laughing at her dilemma, Tormarin appeared to be thoroughly angry over the matter.

Burke remained coolly unprovoked. "I can't say I've any quarrel with the young ruffians," he said. "They afforded me a charming afternoon." "Doubtless," retorted Blaise. "But that's hardly the point. Anyway"—heatedly—"I'll thank you to see that those lads are kept in hand for the future."

Jean glanced across at Burke with some apprehension, half fearing a responsive explosion of wrath on his part, but to her relief he was smiling—a twinkling, mischievous smile that redeemed the ugliness of his features.

"Fraid I can't truthfully declare I'm sorry, Tormarin," he said good-humouredly. "You wouldn't in my place."

The man was keeping his temper in the face of considerable provocation, and Jean liked him better at that moment than she had done throughout the entire afternoon. Tormarin's own attitude she quite failed to understand, and after Burke's departure she took him to task for his churlishness.

"It was really absurd of you, Blaise," she scolded, half-smiling, half in genuine vexation. "As if Mr. Burke could possibly be held responsible for the actions of a mischievous schoolboy! At least he did all he could to repair the damage; he brought me back, and recovered the missing pair of oars for me. You hadn't the least reason to flare up like that."

Blaise listened to her quietly. The anger had died out of his face and his eyes were somewhat sad.

"You're right," he said at last, "absolutely right. But there rarely is any reason for a Tormarin's temper. Do you know—it sounds ridiculous, but it's perfectly true—it was all I could do not to knock Burke down."

"My dear Blaise, you fill me with alarm! I'd no idea you were such a bloodthirsty individual! But seriously, what had the poor man done to incur your wrath? He's been most helpful."

There was an element of self-mockery in the brief smile which crossed his face.

"Perhaps that was just it. I've rather grown to look upon it as my own particular prerogative to help you out of difficulties."

"Well, naturally I'd rather it had been you," she allowed, twinkling.

"Do you mean that?"—swiftly. "Of course I do"—lightly. She had failed to notice the eagerness of demand in his quick question. "I'm more used to it! Besides, I believe Mr. Burke rather frightens me. He's a trifle—overwhelming. Still"—shaking her head reprovingly—"I don't think that excuses you. You must have a shocking temper."

He laughed shortly.

"Most of the Tormarins have ruined their lives by their temper. I'm no exception to the rule."

Jean's thoughts flew back to the description she had overheard when in London: "A Tormarin in a temper is like a devil with the bit between his teeth."

ACID STOMACH

EXCESS acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. Harmless, and tasteless, and yet its action is quick. You will never rely on crude methods, once you learn how quickly this method acts. Be sure to get the genuine.

The ideal dentifrice for clean teeth and healthy gums is Phillips' Dental Magnesia, a superior tooth-paste that safeguards against acid-mouth. (Made in Canada.)

Children's COLDS

Mothers testify that BABY'S OWN TABLETS are invaluable for children's head colds and feverish colds.

"At the first sign of a cold," writes Mrs. Isaac Kellar, 4 Shaftesbury Place, Toronto, "or if the children have been out in damp weather, I give Baby's Own Tablets, and they are all right again the next day." Mrs. Albert E. Knowles, R. R. 3, Granton, Ont., writes: "Baby's Own Tablets relieve colds so easily—I wouldn't be without them if they cost twice as much." Mrs. James O'Connor, Godfrey, Ont., writes: "Baby's Own Tablets are wonderful for children's colds and fever."

DR. WILLIAMS'

BABY'S OWN TABLETS

Make and Keep Children Well—As Mothers Know

Mrs. Frank A. Tallen, Harrowsmith, Ont., writes: "It was next to marvelous, after giving Baby's Own Tablets, how quickly the fever disappeared."

When you see your child with a cold coming on, don't lose any time in giving Baby's Own Tablets. They are effective, also, for teething troubles, colic, constipation, vomiting, sleeplessness, and whenever a child is restless and fretful. Absolutely SAFE—see the analyst's certificate in each 25-cent package. Over 1,250,000 packages sold in 1931.

222

Little Helps For This Week

"I will fear no evil, for Thou art with me."—Psalm xxxiii. 4.

In Heavenly love abiding,
No change my heart shall fear,
And safe is such confiding,
For nothing changes here.
The storm may roar without me,
My heart may low be laid,
But God is round about me,
And can I be dismayed?

—Anna Laetitia Waring.

Just suppose that we could get rid of all unnecessary and previous terror; just suppose that we could be sure of final victory in every conflict, and final emergence out of every shadow into brightest day; how our hearts would be lightened, how much more bravely we should work and fight, and march forward! This is the courage to which we are entitled, and which we may find in the thought that God is with us everywhere. The course of our journey has been appointed by Him; He knows the way through the darkness.

—Henry Van Dyke.

Acidity Overcome

Wonderful Results From Famous Vegetable Pills

Instead of having an acid stomach and being constipated, Mr. Frank C. is well. "I can eat anything since trying Carter's Little Liver Pills," he says. Because they are PURELY VEGETABLE, a gentle, effective tonic to both liver and bowels, Dr. Carter's Little Liver Pills are without equal for correcting Constipation, Biliousness, Headaches, Poor Complexion and Indigestion. 25c. & 75c. red pkgs., everywhere. Ask for Carter's by NAME.

An Irishman's Way

An Irishman got a job at a railway station. When the first train came in, however, he forgot the name of the station; so he called out: "Here ye are for where ye're going. All in there for here, come out."

RESTFUL SLEEP for FRETFUL, FEVERISH CHILD

—With Castoria's regulation

When your child tosses and cries out in his sleep, it means he is not comfortable. Very often the trouble is that poisonous waste matter is not being carried off as it should be. Bowels need help—mild, gentle help—but effective. Just the kind Castoria gives. Castoria is a pure vegetable preparation made specially for children's ailments. It contains no harsh, harmful drugs, no narcotics. Don't let your child's rest—and your own—be interrupted. A prompt dose of Castoria will urge stubborn little bowels to act. Then relaxed comfort and restful sleep! Genuine Castoria always has the name:

Wm. H. Fletcher

CASTORIA
CHILDREN CRY FOR IT

For Catarrh.—It is one of the chief recommendations of Dr. Thomas' Electric Oil that it can be used internally with as much success as it can outwardly. Sufferers from catarrh will find that the Oil when used according to directions, will give prompt relief. Many sufferers from this ailment have found relief in the Oil and have sent testimonials.

Saskatchewan Honey Production

Returns for 1931, based on 1,466 bee-keepers, show that Saskatchewan had 7,316 colonies of bees which gathered an average of 83.3 pounds of honey per hive, or a total of 609,480 pounds of honey for the province. Many bee-keepers in the northern and eastern portions of the province report a crop of 100 pounds or more of honey per hive, all of which was secured during the month of August.

Protect the child from the ravages of worms by using Mother Graves' Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

British Columbia Industries

British Columbia produced an estimated value of \$149,025,054 in the four primary industries in 1931, according to provincial figures. Lumber production, including pulp and paper, accounted for \$51,500,000 of the total; minerals were produced to the value of \$26,567,300; agricultural products amounted to \$55,957,754, and fisheries to \$15,000,000.

Soft corns and warts are ugly, painful and irritating. Remove them quickly and surely with Douglas' Egyptian Liniment.

Dirigibles For Russia

General Umberto Nobile, Italian commander of the ill-fated expedition to the North Pole, has signed a contract with the Soviet Government to design and construct a fleet of dirigibles over a period of more than three years.
